Education

B.Tech – Computer Engineering, *Government Engineering College, Gandhinagar (Currently Studying 3rd Year)* 2027 | Gandhinagar
Course Work: OOPs | Problem Solving | Data Structure & Algorithms | Computer Networking | Operating Systems | Web Technologies

Skills

Programming Languages: C-Programming, Java, Python, JavaScript, SQL

Technologies: ReactJS, NodeJS, ExpressJS, MySQL, MongoDB, Websockets, HTML, CSS, shadcn, TailwindCSS, MaterialUI, Bootstrap.

Core Skills: Frontend development, Backend development, Fullstack architecture, Database management, Testing, Debugging, Authentication & Authorization, Performance optimization, Responsive design, API design, CI/CD, Web security, Deployment, Server-side rendering (SSR), Code reviews, TDD (Test-Driven Development)

Tools: AWS, Git, GitHub, Webpack, Jira, Postman, VS Code, Cursor

Professional Experience

Full Stack Web Developer (Project-Based Experience) Self-Directed Projects | 2024 – Present | Gandhinagar, India

- Contributed to the development of **3+ full-stack web applications**, implementing end-to-end features from requirement analysis to deployment
- Designed and developed **RESTful APIs using Node.js & Express**, ensuring efficient data flow and optimized response times
- Built **responsive and scalable user interfaces** using React.js and Tailwind CSS, optimized for all screen sizes
- Implemented **authentication, role-based access control, and secure backend logic**
- Optimized application workflows and improved overall **user experience and performance**
- Followed **agile-style development practices**, including task breakdown, iterative development, and testing
- Actively debugged, tested, and refactored code to ensure **clean and maintainable software**
- Used **Git & GitHub** for version control and project management

Projects

Tripbnb - Travel Listing Platform

Tech Stack: HTML, CSS, Bootstrap, JavaScript, Node.js, Express.js, MongoDB, EJS

Source Code: GitHub

- Developed a full-stack travel accommodation platform with **role-based access control** for Users and Guests
- Implemented **secure authentication** with signup and login functionality
- Users can create, edit, and delete property listings, while Guests can view listings without authentication
- Integrated **image upload functionality** for property listings
- Built a **dynamic navbar** that updates based on user authentication and role
- Added **listing filters** for improved search and browsing experience
- Designed a **responsive and user-friendly UI** using Bootstrap and EJS

Job Mitra - Production-Ready Job Portal Web Application

Tech Stack: MongoDB, Express.js, React.js, Node.js, Tailwind CSS

Source Code: GitHub

- Developed a **production-ready job portal** allowing students to search, filter, and apply for jobs
- Implemented **role-based access control** for students and recruiters
- Designed an **application tracking system** with real-time status updates
- Enabled **resume upload and download** along with complete profile management
- Optimized backend APIs using **pagination, search filters, and efficient database queries**
- Ensured scalability, security, and clean code practices across the application

e-Book - Production-Ready Book E-Commerce Web Application

Tech Stack: React.js, Redux Toolkit, Node.js, Express.js, MongoDB, Tailwind CSS, shadcn/ui

Source Code: GitHub

- Developed a **production-ready full-stack book e-commerce platform** with secure user and admin workflows
- Implemented **authentication & role-based authorization** for Users and Admin
- Users can browse books, view details, add to cart, place orders, and track order status
- Built **Admin dashboard** to manage books, categories, orders, and users (CRUD operations)
- Integrated **Redux Toolkit** for global state management (cart, auth, orders)
- Designed **secure RESTful APIs** with proper validation, error handling, and middleware
- Implemented **order management system** with dynamic status updates
- Built a **responsive and modern UI** using Tailwind CSS and shadcn/ui
- Optimized APIs and database queries for **performance and scalability**
- Used **Git & GitHub** for version control and structured project workflow
